DETAILED ACTION

Election/Restriction

1. Applicant's election without traverse of Species I, Figs. 1 and 16-38c, claims 1-6, 25, 32, 33, and 45-53 in Paper No. 8 is acknowledged.

Claim Objections

2. Claim 32 is objected to because of the following informalities:
--"state" (line 11) should be -- a state --.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25 and 45-53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2861

Claims 25 and 53 are ambiguously constructed and indeterminate in scope because they claim both an apparatus and a method of using the apparatus in a single claim (See Ex parte Lyell, 17 USPQ2d).

Claim 45, how can the hydrophobic group be oriented towards itself (lines 8-10)?

The remaining claims are also rejected under 35 U.S.C. 112, second paragraph, for being dependent upon a rejected base claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Simizu et al. (US 4,940,542).

Simizu et al. discloses all the claimed features of the invention including:

- a negative pressure producing fiber body (62) for use in a container (10) for containing a liquid (16), which is to be supplied to a liquid ejecting head (50) for ejecting the liquid,

Art Unit: 2861

in a manner that allows the liquid to be supplied (Fig. 1), comprising an olefin resin (column 7, lines 65-66) at least on the fiber surface thereof, said olefin resin having a lyophilic group (column 12, lines 48-50) in an oriented state on the surface thereof.

Even though Simizu et al. does not disclose using the fiber for recording, it has been held that a claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

Allowable Subject Matter

5. Claims 25 and 45-53 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

6. Claims 2-6, 32, and 33 are allowed.

Reasons For Allowance

7. The combination as claimed wherein a fiber provided with a polymer at least part of its surface, said polymer including a first portion having a hydrophilic group

Art Unit: 2861

and a second portion having a group of which interfacial energy is lower than that of said hydrophilic group and almost the same as the surface energy of said part of the surface is not disclosed, suggested, or made obvious by the prior art of record.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lazear (GB 2 058 802) discloses a process for rendering a normally hydrophobic polyolefin hydrophilic (Abstract, lines 1-4).
